How to use this PE independent learning booklet

Our PE curriculum is taught through 3 main areas. Social Me - how I communicate with others, play fairly and work as a team player. Performance Me - learning skills, techniques and tactics within a range of activities and learning the rules and regulations so you can play competitively. Healthy ME - learning how we keep our body healthy and knowing how the body works when we perform.

This booklet starts with identifying what sporting activities you will be taught over the year and asks for you to make a self assessment on your attainment level for each sport by identifying a target grade you will be aiming for from a Platinum, Gold, Silver and Bronze framework. In order to do this you will need to read the practical activity overviews and content which explains what you will be taught within each activity area. Also you will need to look at the Assessment for learning model on the final page of this booklet. (Page numbers above.)

The next section explains the theory elements of physical education that we will cover and provides some tasks for you to complete once you have been taught the content in lessons. This is followed by sport specific information regarding skills, rules, positions and tactics needed to be successful when performing within each sport and some tasks are included to test your knowledge. The final section explains how assessment in PE is made. This happened mainly within the last lesson of an activity block where your teacher will assess you against the criteria listed. Your teacher will also make informal assessments at other points throughout the activity block.

<u>Curriculum Map 2022 - 23</u>

Task - Can you complete the table with what activities you will be covering over the course of the year?

	5th Sep - 7th Oct (5 lessons)	10 th Oct – 18 th Nov (5 lessons)	21 st Nov – 16 th Dec (4 lessons)	4 th Jan – 10 th Feb (6 lessons)	20 st Feb – 31 st March (6 lessons)	17 th April – 26 th May (6 lessons)	5 th June – 14 th July (5 lessons)

ATHLETICS							
In this unit, pupils begin to use their knowledge of athletics events, strategies and techniques to develop and enhance replication and performance. Pupils develop their understanding of fitness and its relationship to performance. In athletic activities, pupils will engage in performing and improving their skills and personal and collective bests in relation to speed, height, distance and accuracy.							
Accurate Replication Developing Physical and Mental Capacity Developing Skills/Performance							
Pupils will develop athletic skills and accurately replicate techniques to achieve an outcome. Pupils will further develop the skills of sprinting, sustained running, jumping and throwing. Pupils should understand that different events demand different skill types and be able to adapt their skills to the needs of the event. Students describe the elements of an	Pupils to prepare and recover from exercise safely and effectively and to gain an understanding of the principles used.  Schools could: provide school-based indoor and outdoor clubs for ath activities provide links to local community-based clubs set up inter-form/house and inter-school competitions a challenges encourage pupils to watch quality performance live, or television or on the internet 	 running, throwing and jumping, eg static stretch/pa hamstring, abductors, quadriceps, pectorals, bicept training, fartlek training, endurance, power Speaking and listening – through the activities pupils solve a problem, consider alternatives, structure pla Reading – through the activities pupils could: 	 Through the activities in this unit pupils will be able to understand, use and spell correctly words relating to: running, throwing and jumping, <i>eg static stretch/passive stretch,controversial stretches, Achilles tendon, hamstring, abductors, quadriceps, pectorals, biceps, triceps, abdomen, aerobic, anaerobic, interval training, fartlek training, endurance, power</i> Speaking and listening – through the activities pupils could: solve a problem, consider alternatives, structure plans and organise group activity 					

Striking and Fielding						
n this unit pupils focus on accurate replication & further developing, implementing and refining techniques for batting, bowling and fielding. Pupils will further work on the skill of outwitting opponents. In striking and fielding games, players achieve this by striking the ball so that fielders are deceived or avoided, and then running between wickets or around bases to score runs. Pupils should begin to accurately umpire games.						
Outwitting an opponent: Pupils will further develop the ability to outwit opponents using strategies and tactics. Pupils will learn to apply consistency & accurate timing in the use of techniques for batting, bowling and fielding. Pupils should begin to develop the ability to evaluate performances. Continual development and refinement of the learnt skills will contribute to producing an improved performance. Theoretical Learning for Physical Education

		Content
Section 1	Theoretical learning Challenge linked to main topic	These topics will be covered within learning cycle 1 & 2. Related questions to be
	with clear, measurable outcomes and reference to KS3 Knowledge & Skills	included in the Independent Learning Tasks set in term 3.
	Bone Classification	Location, name and sporting action created during a sporting action. (Examples below)
		Cranium - header in Football Fibula – pass in football
	All – to be able to identify 3 upper body, 3 lower body & 3 trunk area	Clavicle – handstand - gymnastics
	bones.	Humerus – Bicep curl – weight training
Topic 1		Radius – Bicep curl – weight training
TOPIC 1	Most – To be able to identify the most important bone that is used	Ulna - Bicep curl – weight training
	in a specific sporting activity.	Sternum – Protection of lungs during boxing
		Ribs - Protection of lungs during boxing
	Some – to be able to locate 14 main bones.	Vertebral Column – Forward roll bending and lowering phase in gymnastics
		Femur – Shot in football
		Patella – Bending knee when sprinting
		Tibia – Shot in Football.
	Different types of stretching	Two Types of stretching – static and dynamic.
		Static - standing still and stretching.
	All – name and explain the action of the two main types.	Dynamic – completing similar stretches but whilst moving with swinging or jerking
Topic 2		movements.
	Most – identify different stretches relevant to certain sports	What muscle areas are important to stretch when completing specific sporting
		activities?
	Some – How long should you hold each stretch for?	Football = legs etc. Time ranges - 10-15 seconds.
	Recap of the 11 muscle groups	Location, name and sporting action that the muscles with be used within.
		Deltoid Gluteal
	All – to be able to identify 3 upper body, 3 lower body & 3 trunk area	
	muscles.	Latissimus dorsi
		Pectorals
Topic 3	Most – to be able to select which muscle groups are used the most	Biceps
	with your certain activity.	Triceps
		Abdominals
	Some – to be able to locate 11 muscle groups.	Quadriceps
		Hamstrings

	Recap of the components of fitness	Strongth	The ability to overcome resistance			
		Strength	The ability to overcome resistance			
	All – to be able to name and explain cardiovascular endurance, muscular endurance, speed and Strength. Most – To be able to explain which components of fitness are most	Dynamic strength	This is similar to the definition of muscular endurance			
		Static strength	The ability to hold a body part in a static position			
		Speed	The maximal rate in which an individual is able to perform a movement or cover a distance in the shortest period of time			
	important to certain sports.	Power/explosive strength	The product of strength and speed			
Topic 4	Some – to be able to identify and explain all 10 types of fitness.	Cardiovascular Endurance (aerobic power)	The ability of the heart and lungs to supply oxygen to working muscles			
		Flexibility	The range of movements possible at joints			
		Agility	The ability to move and change direction at speed whilst maintaining control			
		Balance	The maintenance of a centre of mass over a base of support			
		Co-ordination	The ability to use two or more parts of the body together, smoothly and efficiently			
		Reaction Time	The time taken to initiate a response to a stimulus			
		Muscular Endurance	The ability of a muscle or muscle group to undergo repeated contractions, avoiding fatigue			
		Location and name:				
	Types of joints	Location and name:				
	Types of joints All – to be able to name the 2 different types of joints hinge and ball		shoulder			
Topic 5		Ball and socket = Hip and				
Topic 5	All – to be able to name the 2 different types of joints hinge and ball Most – To be able to identify the different locations of hinge and bal and socket joints. Some – To be able to identify the correct name and type of joint	Ball and socket = Hip and Sporting action – bowling				
Topic 5	All – to be able to name the 2 different types of joints hinge and ball Most – To be able to identify the different locations of hinge and bal and socket joints.	Ball and socket = Hip and Sporting action – bowling front kick in Karate. Hinge = Elbow & knee				
Topic 5	All – to be able to name the 2 different types of joints hinge and ball Most – To be able to identify the different locations of hinge and bal and socket joints. Some – To be able to identify the correct name and type of joint	Ball and socket = Hip and Sporting action – bowling front kick in Karate. Hinge = Elbow & knee Knee – kicking a ball / kne	in cricket / javelin throw – shoulder - ball and socket. High e lift when running. Bicep curl in weight lifting.			
	All – to be able to name the 2 different types of joints hinge and ball Most – To be able to identify the different locations of hinge and ball and socket joints. Some – To be able to identify the correct name and type of joint used in certain sporting actions. Diet in Sport All – pupils to identify the importance of carbohydrates in the diet.	Ball and socket = Hip and Sporting action – bowling front kick in Karate. Hinge = Elbow & knee Knee – kicking a ball / kne Carbohydrate – simple / c	in cricket / javelin throw – shoulder - ball and socket. High e lift when running. Bicep curl in weight lifting. omplex – main source of energy – pasta, rice, potatoes.			
Topic 5 Topic 6	All – to be able to name the 2 different types of joints hinge and ball Most – To be able to identify the different locations of hinge and ball and socket joints. Some – To be able to identify the correct name and type of joint used in certain sporting actions. Diet in Sport	Ball and socket = Hip and Sporting action – bowling front kick in Karate. Hinge = Elbow & knee Knee – kicking a ball / kne Carbohydrate – simple / c	in cricket / javelin throw – shoulder - ball and socket. High e lift when running. Bicep curl in weight lifting.

BASKETBALL

OFFENSE: The attackers move the ball up the court using

a combination of passing and 'dribbling' (bouncing the ball

dribbling ('double dribble'), or holding the ball's underside

('carry'). The offense has limited time to take a shot, ranging

from 24 to 35 seconds, depending on the level of game. If they

fail to make a shot that touches the rim in that time, the ball is

creating possible openings to score. Commonly, players score

('jump shot'), or leaping at the hoop and tossing the ball in

Passing is the key to offensive strategy. Moving the ball

around quickly, the attackers force the defense to adjust,

by jumping and shooting the ball with two hands

turned over to the opposing team.

while running). Taking more than two steps without bouncing

the ball ('traveling') is not allowed, as is stopping and starting

QUICK FACT BOX

 OBJECT OF GAME: To get the ball through the opponents' hoop.
 OURATION: 32 (High School) to 48 (NBA) minutes, depending upon the type of game. NBA has four quarters twelve minutes per quarter. High School has four quarters eight minutes per quarter. OFFICIALS: A Referee, and one or two Umpires (also called Referees in some games).
 PLAYERS: Each team has five

players on the court at any one time.

HOOP: Ten feet high. The diameter

of the rim is 18 inches

V

Game Overview

with one hand ('lay-up'), or jumping up near the basket and forcing the ball through the hoop while airborne ('slam dunk').

DEFENSE: There are two basic defensive strategies: 'manto-man', where each defender guards one member of the opposition (often the player in the same position), and 'zone', where defenders guard specific areas of the court.

In both, the defense tries to take possession in three main ways: stealing the ball, preventing a shot from being taken before the shot clock runs out, or forcing a difficult shot and then recovering the rebound (gaining possesion of the ball after a failed throw on basket). The defense takes possession if the offense puts the ball out of bounds, or when an attacker commits a foul or violation.

Positions

O Point Guard

Also known as the '1', they are usually the team's best dribbler. They bring the ball up the court, call the plays and direct the offense. Also excellent passers, they are responsible for setting up plays to create scoring opportunities.

2 Shooting Guard

Also known as the '2', they must have excellent shooting skills, including a strong jump shot, and good passing skills. A good Shooting Guard must have an excellent 'free throw' percentage, and be dependable in close games. They work closely with the Point Guard.

Start of Play

TIP-OFF: The game begins with a 'tip-off', where an official tosses the ball at center court and one player from each team (generally the tallest) tries to tap it to their teammates. The team that takes possession is on offense.

THROW IN: When either team causes the ball to cross the sideline, the opposing team gains possession and throws it in to a teammate.

SCORING

ONE POINT: Shooting the ball through the hoop from the Free Throw Line. These are taken when a player is fouled and they get one or two free attempts to shoot at the hoop.

TWO POINTS: Shooting the ball through the hoop from anywhere inside the three point line. THREE POINTS: Shooting the ball through the hoop from outside the three-point line.

Small Forward

The Small Forward, or the '3', must be a skilled player that balances strong offensive and defensive skills. Usually, they are taller than the Point Guard and the Shooting Guard.

O Power Forward

Also known as the '4', the Power Forward is a larger player with strong defending and rebounding skills, who provides a strong presence in the middle of the court.

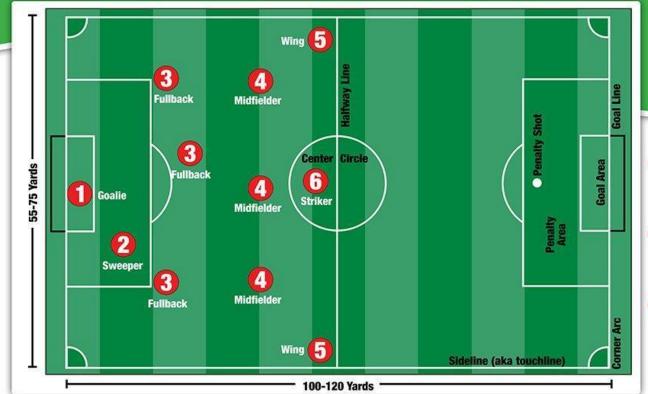

Center

The Centre, or the '5', is usually the tallest player on the team and tends to defend and score close to the basket. They are considered the 'anchor' of the defense, blocking and opposing shots whenever possible. They must have good footwork and good ball control.

R

www.productivefitness.com

QUICK FACT BOX

OBJECT OF GAME: To score by kicking or heading the ball completely into the opponent's goal. DURATION: Two 45-minute halves. The clock

runs continuously and the referee, who is also the timekeeper, can add time at the end of each half to compensate for time lost to injuries and other delays. The teams switch sides at halfilme. OFFICIALS: One referee, two linespersons.

OFFICIALS: One referee, two linespersons. PLAYERS: Each team begins with eleven players on the field.

YELLOW CARD: A warning for a minor foul.

RED CARD: Disgualification for a major foul or a player's second yellow card. The most popular sport in the world, soccer (known as that football outside North America) is played in almost every country. Players are not allowed to use their hands or arms, except on throw-ins, so the game really comes down to foot control of the ball. The goalle is the only player who can use

- their hands in game play. **OFFENSE:** The attacking team attempts to score by kicking or heading the soccer ball into the opposing team's goal. By using ball control skills to pass and dribble they attempt to create scoring opportunities. Attackers without the ball run into open parts of the field to receive passes. This is called 'creating space', and may open a gap in the defense, creating a chance for a shot on goal.
- An 'offside' foul is called when the ball is passed to a player

Game Overview

that is closer to the other team's goal than both the ball and that team's last defender. You cannot be offside on a corner kick, goal kick, or throw-in. This foul is to prevent unfair fastbreak goals.

DEFENSE: To prevent the offense from scoring, the defending team must play a precise positional game. They must do their best to keep the attacking side out of the Penalty Area, where the chance of the offense scoring is much higher. To accomplish this the defense often packs the middle of the field with players. At the same time, they work to get possession of the ball if an attacker mishandles it, or makes a bad pass.

Positions

O Goal Keeper or Goalie

The 'keeper' wears different colors than their team and is responsible for preventing goals by using body positioning through quick and dynamic moves to stop the ball. They are the only players allowed to touch the ball with their hands during play.

2 Sweeper

Stationed behind the fullbacks, the sweeper is a defensive player who collects loose balls near the goal. They are the last line of defense on breakaways and their presence allows the fullbacks to move up and join the offensive attack.

3 Fullback or Defense

Defenders who shadow ('mark') opposing forward and attempt to prevent direct shots on goal. When they gain possession of the ball, fullbacks begin the attack by passing up to the midfielders.

Start of Play

Midfielder or Halfback Midfielders are key to both the offense and the defense. On offense, they pass ('distribute') the ball forward and suppor

and the defense. On offense, they pass ('distribute') the ball forward and support the attack by advancing toward the opponent's goal. On defense, they try to stop the attack before it gets close to their goal.

6 Wing or Forward

Swift, accurate passers, Wingers make long runs hoping to draw defenders into the corners. From there, they have the opportunity to pass ('cross') the ball into the middle.

6 Striker or Center Forward

Strikers are primarily offensive players who are accurate shooters. Their task is to capitalize on the scoring opportunities that come their way.

KICKOFF: Each half begins with the teams placed on the side of the Halfway Line containing their goal. Play starts by one team kicking the ball across centre into the other's zone. After each goal, these positions are taken again and the scored-upon team kicks off.

THROW-IN: When either team causes the ball to cross a sideline (aka 'into touch'), the opposite side throws the ball back into play. The throw must be made with both hands on the ball, and both feet on the ground.

CORNER KICK: When the defending team directs the ball across their own Goal Line, the attacking team kicks the ball back into play from the nearest corner.

GOAL KICK: When the attacking team directs the ball across the defender's Goal Line, the defending goalkeeper kicks the ball back into play.

HANDBALL RULES FOR BEGINNERS

DEAR HANDBALL FRIENDS,

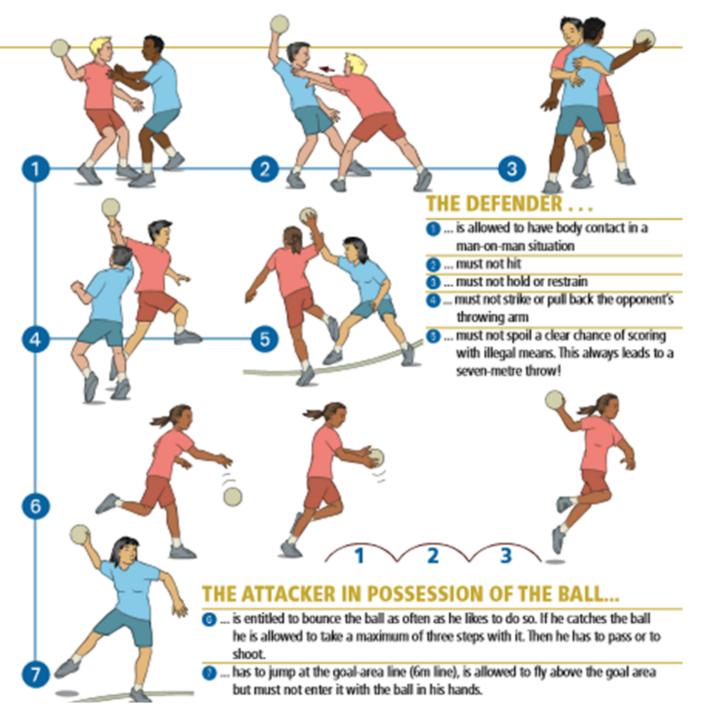

Handball is a terrific fast paced play including many goal-scoring scenes, fascinating tackling, acrobatic shots, brilliant tricks and spectacular goalkeeper saves. Enjoy the handball matches!

Dr. Hassan Moustafa PRESIDENT OF THE INTERNATIONAL HANDBALL FEDERATION

BASIC RULES

HANDBALL MEANS...

- ... 2 teams with 6 court players and 1 goalkeeper each compete.
- ... player substitutions can be effected at any time.
- ... the court players must not enter the goal area (6m in front of the goal).
- ... the goalkeeper is entitled to act as a court player.
- ... the playing time is two halves of 30 minutes with a 10 min-break Inbetween.
- ... two referees lead the match.

🗯 Basic Table Tennis Rules (Singles)

- All games are played to 11 points. Games are not played to 21 points anymore.
- Matches are the best of any odd numbered games (3 of 5, 4 of 7, etc.). Agree on number of games before you start the first game of the match.
- To start, flip a coin (do not "PING" for serve). The winner chooses to either serve or receive first, or pick which end of the table to play at for the first game. The loser gets the remaining choice.
- Alternate serves every 2 points until the end of the game or the score reaches 10–10 (deuce). At 10–10, alternate serves each point until one player is ahead by 2 points and wins the game.
- The first server of one game becomes the first receiver of the next game.
- Switch ends of the table at the conclusion of each game. If the match goes to the last possible game (e.g., game 5 in a 3/5 match), switch ends when the score first reaches 5.
- 7. To perform a legal serve:
- a. Hold the ball in the stationary open palm of the toss hand. The ball is to be held **behind** the endline of the table and **above** table level. The ball is **not** required to be within the boundaries of the sidelines. The ball must remain visible to the opponent throughout the entire service (no ball hiding).
- b. Toss the ball straight up a minimum of 6 inches (no maximum) and strike it as it falls. If you fail to make a good serve after you've tossed it, you lose the point, even if you don't contact the ball.
- c. After the server contacts the ball, the serve must first contact the server's side of the table, clear the net without touching it, and land **anywhere** on the opponent's side.
- d. If the served ball hits the net and falls back on the server's side, or off the side, the point is lost. But if the served ball contacts the net and falls onto the opponent's side, then the serve is called a "Net" and is re-served. There is no limit to the number of consecutive "net serves".

- 8. The ball must bounce only once on the receiver's side before being hit back by the receiver. From that point on, all returns must pass directly over or around the net assembly and land on the opponent's top surface. A return touching the net or its supports is still in play. Returns striking anything other than the net or the opponent's playing surface are out of play.
- If a player obstructs the ball by touching it before it has a chance to land on the player's side of the table, the point is lost, except if the ball is obstructed while returning a serve, in which case, the rally is a let and is re-played.
- A ball striking the top edge of the table is good, but a ball striking the side is not good.
- Returns rebounding **directly** off the racket hand or any part of the racket are still in play. Returns struck by **both** hand and racket, or hand with no racket, or racket not in a hand are lost points.
- A player touching the table with their free hand during a point loses the point. A player touching the net or moving the table (even accidentally) during a point also loses the point.
- 13. A player cannot strike the ball twice successively (a "double hit").
- Call a "let" and play the point over, if there is a disturbance during play (someone walks into the court, a stray ball rolls into the court, etc.).
- 15. If both players can not agree on a call, the call is to be made by the player on the side to which the ball was directed. (This is not an actual rule, but an accepted convention for playing nonumpired matches.) When an umpire is present, the umpire makes all calls.

These are the basic rules of ping-pong. More complete and advanced rules can be found on our website.

Year 8 Physical Education Assessment for Learning

<u>Pathway</u>	Practical Skills	Knowledge and Understanding	Evaluating and Improving
Platinum	This pupil is performing Intermediate skills to a high level in both practice and competitive situations. There is a good level of maturity in their work but they cannot yet perform advanced skills consistently.	This pupil has a good understanding of the rules, tactics and positioning. They also have a basic understanding of more advanced rules, tactics and strategies. This pupil can identify which training methods can improve specific elements of each activity and explain why.	This pupil can highlight strengths and weaknesses of themselves and others, giving reasons for their decisions. They can suggest ways to improve identified areas of weakness / performance.
Gold	This pupil is performing a range of Intermediate skills well when in practice and is now using them in competitive situations with some positive outcomes.	This pupil clearly understands the basic rules and tactics, and is developing an understanding of more complex rules and tactics. This pupil can locate and name the most common bones and joints of the body.	This pupil can highlight strengths and weaknesses of themselves and others and give clear reasons behind their decisions.
Silver	This pupil can perform basic skills with accuracy and confidence in practice and a competitive situation. The pupil is starting to perform some Intermediate skills but with limited accuracy.	This pupil understands the basic rules and is demonstrating an understanding of positioning, tactics and strategies in practice and game situations. This pupil can locate and name most major muscle groups.	This pupil can highlight strengths and weaknesses or themselves and others. They can give some basic reasons for their decisions.
	well when in a practice but does not apply them	This pupil understands the basic rules, can apply these in a game situation and is developing an understanding of position, tactics and strategies. This pupil understands the reasons why we warm up using the three separate phases.	This pupil can highlight one or two strengths and weaknesses of others or themselves.

At the end of each activity block you will be assessed on your practical skills, knowledge and understanding and ability to evaluate and improve. The framework above lists the topics and components you will be measured in for a year 8 pupil. You will take part in a practical assessment usually during your last lesson in which your teacher will give you a grade based on your ability level. Throughout the year at the end of each activity you will complete a similar assessment and your grades logged onto a spreadsheet, (the activities that you will learn are on the front of this booklet.) From this spreadsheet an average score will be calculated, this is the grade that your teacher will award you within your school report that is completed at the end of each term and sent home to parents. If you need to contact your PE teacher please see their contact details below:
